

Manufactured in Herschel's state-of-the-art UK Production Facility, the Herschel Advantage IR infrared heaters are perfect for commercial and workspace applications. The Advantage IR heaters can be both wall and ceiling mounted offering a versatile heating solution for industrial areas such as workstations and packing bays where people are working. Available in two outputs of 1300 & 1950 Watts, these heaters can be controlled to heat specific zones, providing effective comfort heating precisely where it is required, preventing wastage of heat in unused areas and reducing energy consumption.

With a choice of white elements in a silver body or black elements in a black body, the Herschel Advantage IR will look great in any commercial space. Additional benefits of these heaters include their silent operation and simple installation. Installation costs are significantly lower compared to oil or gas alternatives, requiring only an electric cable, eliminating the need for planning or specialist skills. When powered by a clean energy tariff, this presents industrial and commercial organisations with a net zero heating solution. The Advantage IR heater is supplied in recyclable packaging. The Advantage IR heating range has no maintenance or safety inspection requirements.

For larger commercial projects we would always recommend Herschel carry out a survey or detailed desktop assessment.

Note: Emitters may give off a slight orange glow at higher voltages.

Available Models

Part Number	Rated Power	Dimensions	Weight	Heated Zone m ²
IR2-1300B	1300W	51 x 10 cm	3 kg	6 - 9
IR2-1300W	1300W	51 x 10 cm	3 kg	6 - 9
IR3-1950B	1950W	76 x 10 cm	4 kg	9 - 12
IR3-1950W	1950W	76 x 10 cm	4 kg	9 - 12

Technical Details

Heating Element	2 or 3 x White or black-glazed ceramic longwave Infrared emitters
Voltage	220 - 240V 50/60Hz
Body	Stainless Steel or Black powder-coated body.
Warm Up Time	<5 Minutes
Useful Wavelength Range	3 - 10µm
IP Rating	IPX4
Cable	1.5m
Certificates	
Warranty	5 years

IMPORTANT

The heating elements reach very high temperatures without visible signs of the unit being on. Because Advantage IR2 & IR3 are not fitted with a protective grill, the heaters are not for domestic or household use. Also, the heaters must not be used or installed in any commercial premises where they can be accidentally touched or where there is a risk of damage to the ceramic elements. In areas with air movement/wind the directional Far Infrared spread may reduce by 1/3 to 1/2. In these areas we recommend mounting at the lowest height and proportionally increasing the number of heaters. Heated zones are based on recommended mounted heights.

Please refer to the Herschel Advantage IR2 & IR3 Installation Manual before installation and for guidance on heated zones and heat intensity at alternative mounting heights. The Herschel Advantage IR rises to very high temperatures in use and the unit (in particular the heater elements) must not be touched when power is applied. After switch off the elements remain hot for a considerable time and the unit should not be touched for a minimum of 30 minutes. NEVER use the heater to ignite materials. Ensure supply voltage does not exceed 240 volts.

The Herschel Advantage IR is guaranteed against failure due to faulty materials or workmanship for five years from the date of purchase and the ceramic elements are warranted for 12 months. In the unlikely event of failure of the unit within this time, the unit must be returned to the supplier for repair or replacement. Refer to the warranty policy on Herschel-infrared.co.uk for more detail including exclusions.
